Expertise: 20+ years' experience as an application and system programmer, architect and technical lead of software projects. Skilled in individual work, team and cross-team cooperation, meeting tight schedules and carrying out challenging development tasks.
Proficient in Agile AI-assisted development (Copilot, OpenSpec, Claude Code, Cline).

- Modern C++.
- Other languages: C, Go, C#, Java, Python, Kotlin, JavaScript.
- Multiplatform development: Windows, Linux, macOS, Android, iOS.
- Cloud and infrastructure: AWS, NetApp ONTAP, gRPC, distributed caching.

Recent Experience:

2025-present Senior Performance Engineer at **Priority Software** *Web-based ERP platform*

Built native Datadog integration in C++ and Go, enabling deep performance diagnostics and bottleneck detection in production. Designed and implemented distributed caching for core ERP services on AWS with NetApp ONTAP, significantly improving response times. Improved legacy codebase health across C++, .NET and gRPC-based services: resolved security vulnerabilities and stability issues.

2023-2024 Senior Software Developer at **Incredibuild** *Developer Tools*

Architected and delivered the macOS version of a distributed C++ build acceleration tool; refactored codebase for multiplatform compatibility, implemented secure inter-machine communications, reverse-engineered Xcode toolchain, and drove customer pilot testing.

2022 C++ Developer for AOSP at **Symmetrium** *Mobile Security and Video Streaming*
Performance tuning of WebRTC on Linux and customized AOSP in the cloud.

2020-2021 Senior Software Engineer at **Reblaze** *Cloud Security*
Designed, developed and deployed an anti-bot Mobile SDK for Android and iOS, written in Java and Objective-C respectively, with a wrapper for Flutter.

2019 Senior Software Engineer at **YI (Xiaoyi)** *Computer Vision*
Face recognition and movement amplification apps, using OpenCV and TensorFlow.

2016-2018 Senior Software Engineer at **Viber** *Secure Messaging and Conferencing*
Improved the C++ core of secure communications for Viber mobile apps, with Objective-C and Java interfaces for Android and iOS.

Earlier: Leading technical roles at Samsung, IBM, Microsoft and various startups in Israel.

Languages: Hebrew, English, Russian.
